LIFE PACK LABS OPEN FOR BUSINESS; OFFERS PACKAGE DEVELOPMENT, TESTING FOR PHARMA, MEDICAL DEVICES

Minneapolis (October 13, 2015) –Pharmaceutical and medical device companies will now have access to a new testing company which provides innovative packaging technology solutions that can improve time-to-market and reduce costs.

Life Pack Labs, Vista, Calif., is staffed by long-time packaging and life science industry professionals with multidisciplinary expertise. The company's mission is to help manufacturers test, as well as design, develop, prototype, validate and troubleshoot life-science packaging. The company expects to be granted its ISO 17025 certification in Q1 2016.

"Life Pack Labs offers a true consultative edge that sets it apart from all other packaging and medical device testing services. Our scientists and engineers have decades of packaging industry experience and testing expertise. By combining these skillsets under one roof, we can reduce both cost and development time while dramatically impacting packaging innovation," said Karen Greene, president.

Life Pack Labs is a business partnership between MOCON, Inc. (NASDAQ: MOCO), the world's leading manufacturer of permeation instrumentation, and Life Packaging Technology LLC, Costa Mesa, Calif., a leader in package engineering services for life science products.

Life Pack Labs combines MOCON's signature brand of packaging permeation, headspace analysis, package integrity equipment and testing services with Life Packaging Technology's expertise in design, testing and validation of packaging systems for sterile and non-sterile medical devices, biotechnology and pharmaceutical products. See <http://www.lifepacklabs.com> for more information.

About Life Packaging Technology

Life Packaging Technology is a leading provider of expert packaging engineering services, design, prototyping, consulting and validation for the life sciences industries. See www.lifepackagingtechnology.com for more information.

About MOCON

MOCON is a leading provider of instrumentation and consulting and laboratory services to medical, pharmaceutical, food and other industries worldwide. See www.mocon.com for more information.

This press release contains forward-looking statements that involve a number of risks and uncertainties. Important factors that could cause actual results to differ materially from those indicated by such forward-looking statements include but are not limited to: uncertainties relating to competition and technological change, setbacks in product development program, slower-than-anticipated customer acceptance of new products, dependence on certain key industries, risk associated with the Company's acquisition strategy and international operations, and other factors set forth in the Company's filing with the Securities and Exchange Commission.
